

**WiQo Eye Contour and Face Serum for Delicate Skin** is an emulsion rich in active ingredients with a moisturizing and elasticizing effect. Avocado oil, Dimethylaminoethanol (DMAE) and Hexapolsaccharides rich in glucuronic acid, combined in a formula with a light texture, make this product an ideal moisturizer for delicate skin areas (such as eye contour) or as a base for makeup and to provide renewed hydration throughout the day. When applied on top of WiQo ICP Cream it rehydrates it, preventing imperfections and small wrinkles from becoming evident. The phytotherapeutic complex, comprising plant extracts of butcher's broom, calendula, gotu kola, licorice and horse chestnut, has anti- edema properties and improves eye bags and dark rings. Ideal for all skin types, the product is dermatologist and ophthalmologist tested.

#### INDICATIONS

It improves both bags and dark circles around the eyes. Designed as a moisturizer for sensitive skin around the eyes, it can also be applied to other areas of the face in the case of very delicate skin. It is a perfect make-up base and when combined with WiQo ICP Cream, it can be used for a "moisturizing touch", even multiple times during the day.

#### DIRECTIONS FOR USE

**Eye contour:** apply a few drops of product to the area around the eyes, in the morning and evening. People with very sensitive skin, or who do not tolerate thick creams, can apply the cream on the entire face as an oil-free moisturizer.

**Make-up refreshing:** apply a few drops on top of your make-up (WiQo ICP Cream) during the day to revive its effect.

#### WARNINGS

For external use only. Apply on undamaged skin. Keep out of the reach of children.
