

WiQo Restructuring Vitamin Cream is an anti-oxidant, anti-aging and anti-wrinkle cream. It contains Idrossipinacolone Retinoate - direct precursor of retinoic acid and part of a new generation of retinoids which are more active than retinol but do not cause as much skin irritation, and high-concentration Vitamin C in anhydrous solution to preserve its quality- which has well known lightening and antioxidant properties.

Thanks to this exclusive combination, WiQo Restructuring Vitamin Cream leads to an overall improvement of photoaging, gives elasticity and firmness to the skin, all without the dreaded side effects associated to other retinol cosmetic products. Add it to your beauty routine, alongside the other WiQo Dermocosmetics today!"

INDICATIONS

Suitable for face, neck, décolleté and hands. It prevents and fights the signs of skin aging.

DIRECTIONS FOR USE

Apply on clean skin of face, neck, décolleté and hands once a day, morning or evening, in cycles of 3 months. You can use WiQo Restructuring Vitamin Cream on its own or in an association with other home-care products of the WiQo line. Use for three months, discontinue for three months and then resume the cycle.

WARNINGS

Do not ingest. Topical use. In the event of contact with mucosa or in the case of skin reddening, remove the product with a wet pad. In the event of contact with the eyes, rinse immediately with saline solution. Do not apply on irritated skin. Do not apply on areas with dermatitis. Keep out of reach of children. During the first applications, slight tingling and slight redness are normal. Apply sunscreen selected according to your own phototype before long exposure to the sun.
