

The **WiQo sebum-regulating balancing face cream** is indicated for the cosmetic treatment of oily skin with acne tendency, with excess sebum, blackheads and dilated pores.

Clinical trials show that the high-technology and avant-garde formula in the cosmetic research of WiQo Balancing Cream reduces the factors that cause sensitivity and pimples, reduces excess sebum and blackheads, minimises irritation and rashes. Contains micronised azelaic acid in combination with encapsulated salicylic acid, three active fermented plant extracts - Bifida lysate, fermented camellia oil, fermented folic acid - vitamin E, vitamin B3 (niacinamide) and Azelamidopropyl Dimethyl Amine (ADA), a super new-generation active ingredient that has many beneficial effects on impure skin.

Indications

Indicated for the face, to provide balance to skins with excess sebum, blackheads, dilated pores, and acne tendency.

Directions

Cleanse the face thoroughly, then apply the cream on the entire face, once or twice a day. The cream should be used for at least 2 months.

WARNINGS

Do not ingest. For external use only. Keep out of reach of children. In the event of contact with mucosa or in the case of skin reddening, remove the product with water and a pad. In the event of contact with the eyes, rinse immediately. Do not apply on irritated skin. Do not apply on areas with dermatitis. Apply sunscreen suitable for your phototype prior to long exposure to the sun.
