

WiQo SMOOTHING FACE FLUID is a dermocosmetic suitable for all skin types, recommended for both young, impure skins, and older skins, even men's, it reduces wrinkle depth.

DIRECTIONS FOR USE

WiQo SMOOTHING FACE FLUID suits all skin types. It is ideal for all seasons including the summer, as its smoothing action contributes to prevent skin thickening. No other treatment is required for oily skins, whilst for other skin types it should be used in conjunction with the other creams in the WiQo ACTIVE SKIN PROGRAMME, following the table provided by our Dermatology Specialist. WiQo SMOOTHING FACE FLUID works best when used at least 30 minutes before applying any other product. Consistent and uninterrupted use is advisable.

WARNINGS

Avoid the area around the eyes. Apply only to undamaged skin. Keep out of reach of children. Like all slightly acidic products, WiQo SMOOTHING FACE FLUID can damage delicate objects (pearls, contact lenses etc.). We recommend the use of sunscreen with SPF matching the skin phototype during prolonged exposure to the sun, as the thinning of the stratum corneum can allow more UV rays to penetrate the skin. For the first few applications a slight tingle and redness are normal.
